## **DETAILED ACTION**

### ***Claim Objections***

1. Claim 32 is objected to because of the following informalities: there is no antecedent basis for the term "said chassis part". If the dependency of claim 32 was changed to depend on claim 31, this objection could be overcome. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

2. Claim 31 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The scope of this claim is not clear. How can the covering device can have a slit defining a strip (as set forth in claim 59) when the strip is partially separated from the covering in order to be clamped in the vehicle chassis (as set forth in claim 31). Claim 31 attempts to redefine the structure of the covering set forth in claim 59, upon which it depends, resulting in a scope that ambiguous.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 30-32, 38-42, 44, 47, 48, 58 and 59 are rejected under 35 U.S.C. 102(b) as being anticipated by Bingham ('320). Bingham discloses a tarpaulin structured and

Art Unit: 1772

dimensioned for placement onto windows of a vehicle, said tarpaulin having at least one slit 12 extending substantially parallel to an edge of said tarpaulin; see the Figures. The phrase "structured and dimensioned for separation ..." does not add any structural feature to the claimed device or any feature that would distinguish the claimed device over that of the reference. Furthermore, the device shown in Bingham may be separated by use of scissors as may applicant's device; see page 2, lines 14-15, of the instant specification. Concerning claim 38, the phrase "intended separation locations" does not define a specific structure feature of the device. Regarding claims 39-42, the slot and strap with Velcro on its ends as disclosed in Bingham meets these limitations. Claim 44 is directed to a process limitation that does not further structurally define the device, and claim 58 is anticipated by the cover shown in Figure 3 of the reference. Applicant's arguments have been considered but are not deemed persuasive. Applicant argues that the transitional phrase "consisting essentially of" disclaims additional elements which would be pertinent to the structure and function of the device. However, this is not the case. The transitional phrase "consisting essentially of" limits the scope of a claim to the claimed features and those features that do not *materially* affect the basic characteristics of the claimed invention. Clearly the addition of attachment means, such as a strap, on the instantly claimed covering device, as is taught in Bingham, would not materially affect the claimed invention. This is particularly evidenced by the fact that applicant has dependent claims, such as claim 39, which include attachment means on the covering device.

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 43 is rejected under 35 U.S.C. 103(a) as being unpatentable over Bingham in view of Dang for the reasons of record set forth in the previous office action.

7. Claims 45, 46 and 54 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bingham for the reasons of record set forth in the previous office action.

Concerning claim 54, providing particular colors to the device in the reference is considered to be within the purview of one of ordinary skill in the art in order to provide a desired decorative effect.

***Conclusion***

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
